

## TECHNOLOGY

**ARTIFICIAL INTELLIGENCE** is used to learn your daily habits and help get rid of your everyday problems. It automatically responds and redirects your schedule when necessary.

**BLOCKCHAIN** is incorporated to facilitate payments between users for outsourced tasks, for storing user reviews and AI audit trails. By using a privately managed but publicly accessible blockchain, transparency and integrity are added to the ecosystem.

**GAMIFICATION** is used to apply game-like design elements for managing and finishing tasks in PlannerScape with the goal of increasing emotional engagement and improving motivation.

## TEAM

PlannerScape's team of six founding members comes from a diverse international background with complimentary areas of expertise.

**Wouter van der Schagt**  
Chief Executive Officer

**Maarten Swemmer**  
Chief Technology Officer

**Lydia van der Schagt**  
Chief Operating Officer & General Counsel

**Raymond Wong**  
Chief Financial Officer

**Marco Ferreira**  
Corporate Development Director

**Roseanne Lau**  
Marketing Director

## ADVISORS

We value our expert advisors and are always looking to partner with innovative professionals who can consult on the PlannerScape project.

**Olga Alexeeva**

**Elly Sunnie Zhang**

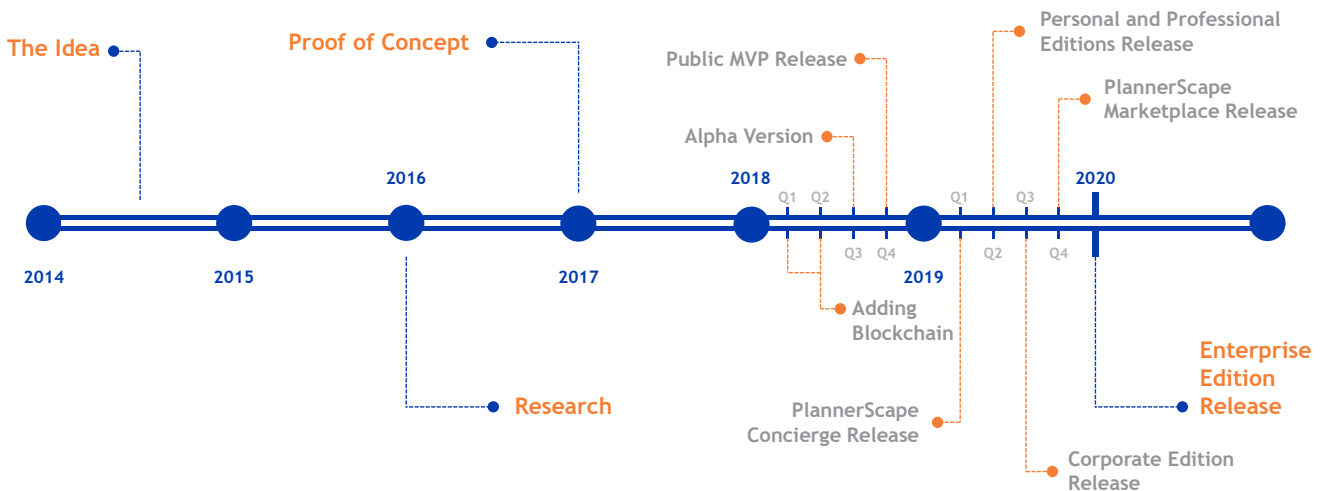

**Joon Jeong**

**SangJin Hong**

## ROADMAP

## TOKENOMICS

PlannerScape utilizes PLAN Tokens for system access (identity management), system enhancements (extras) and a medium of exchange between users of PlannerScape Concierge and PlannerScape Marketplace. The PLAN Token is an ERC-20 token on the Ethereum blockchain (template audited, source code reviewed and published). There are 1,400,000,000 minted PLAN Tokens, 46% of which are reserved for investment over 10 years.
